

# Maintenance Performance Requirements - Wilderness Airscent

Handler \_\_\_\_\_ Dog \_\_\_\_\_

Date of current Wilderness Airscent certification \_\_\_\_\_

*The Maintenance Performance Requirements List must be completed and approved by the Dog Coordinator before the current Wilderness Airscent Certification expires.*

*Training Log Review, First Aid, and CPR must be signed off by the Area Director .*

*The team must have one observed blind search (practice) signed off by an Airscent Tester for each of the required categories and one from the Electives category. The Tester will sign off on a search only if they feel the team has demonstrated the competence required of a certified SARDOC team during that search. It is recommended that the team space these three signed-off searches one per year. The Dog Coordinator may elect to approve performance on a mission in lieu of an MPR based on a submitted mission report.*

Requirement	Signoff (name, date)
Training Log Review	
Current First Aid Certification	
Current CPR Certification
